- 2015-2022 Economic impact of HAS guidelines adherence for French type II diabetes patients
Foundation MGEN for Public Health Research
co-PI (18-mth salary for a postdoc fellow at MGEN, co-mentored with Dr. Sevilla-Dedieu)
Our objective is to explore the impact of good adherence to HAS' guidelines for diabetes follow-up on various economic outcomes.
- 2020-2022 Exploring the impact of LTC reforms on disability risks in Europe
ANR-18-IDEX-0001 Université de Paris 2019
Co-PI with M. Avendano (Kings' College London)
The main objective of this project is to explore how governments' policies in social care can contribute to shape older people's frailty trajectories. Specifically, we explore the impact of publicly financed home-based long-term care services on older people's risks of becoming frail. Specific objectives include: (i) developing a novel, harmonised database of legislation characteristics and eligibility rules for publicly provided LTC (in-cash or in-kind) in European countries and in the UK, covering reforms between 2004 and 2017, (ii), compare trajectories of frailty between the United Kingdom and Europe between 2004 and 2017; (iii) applying new methods to examine the causal impact of LTC legislation on frailty in the UK and Europe.
